Training Opportunities- 2013

Outstanding classes from some of the most knowledgeable and experienced instructors in the business. Owner Pat Shreffler and his associates have customized these courses utilizing their experience. Pat has served over 42 years in the fire service with the USFS and KRN, 22 years on NWCG Type 1 & 2 IMTs and has been instructing Fire Behavior, S & I courses since 1974. Pat and his associates have all served as OPS, SOFR, SITL and Fire Behavior Specialist. Our experience includes planning and executing prescribed burns. We served on S, I & NIIMS curriculum development committees with NWCG, CSTI, NFA, and JAC.

Most of our students say our Fire Behavior courses are the best courses they ever took. Most courses cut corners, ours do not. Ours are taught by a fire behavior specialist and an NWS Fire Weather Forecaster, which is recommended by NWCG. The canned courses do not apply the material to actual fire scenarios, we do! **Our courses can save your life. You will gain experience in handling tough wildland fire situations. We will instruct you how to forecast the outcome of actual life threatening situations and to predict ROS, FL and Safety Zones size. Unfortunately few instructors can or will train you to do these. Wherever you take 290/390 ask if the course meets these standards and trains you to make these predictions.**

We share our experience and research by adding improved AV material, cases studies and exercises to any course we teach because **we care about your safety and competence.**

Contact us at firecouple@aol.com for quality training or one of these sponsors to sign up for a class.
