Ask those who have taken the terrible company and chief officer courses from training companies who's primary focus is to read the PowerPoint slides and you learn absolutely nothing about the position. You get a certificate, but not the necessary knowledge required to do the job well. Now, ask those who have taken ECT classes and everyone will tell you that the instructors knowledge and experience provided an adult learning environment by sharing the most relevant curriculum you need to know to perform skillfully and effectively as a company or chief fire officer. We will take you on a fantastic educational journey, please join us!
