

MONTEREY COUNTY FIRE TRAINING OFFICERS ASSOCIATION

PRESENTS:

SFM ENGINE OPS: THE ART OF STRETCHING, FLOWING, AND MOVING

With an emphasis on the first line, this class focuses on the art of stretching, flowing, and moving a hoseline. A goal on every fire is for the first unit to arrive on scene and get a line to the seat of the fire as quickly and efficiently as possible. How we achieve that relies heavily on our ability to estimate the stretch, deploy the line, and manage it from point A to point B. In addition to advancing the line, students will also learn both the positive and negative effects an engine company can have on the fire, an introduction to stream selection, water mapping, air entrainment, and single person forcible entry. Students can look forward to a full day of discussion and hands-on, scenario-based training aimed at making your next stretch as efficient as possible.

2 SESSIONS OFFERED

MAY 8TH AND MAY 9TH

LOCATION: 4495 JOE LOYD WAY

SEASIDE, CA 93955

COST: \$250 FOR MCFTOA MEMBERS

\$300 FOR NON MEMBERS

LUNCH PROVIDED

REGISTRATION:

INSTRUCTORS:

RICK ARCHULETA

JD FLINT

RYAN MORRISON

JEFF OLIVER

MATT RAU
