

Hazardous Materials Incident Commander (CSTI)

This 2 day course provides students the knowledge, skills, and tools to assume command of an emergency response to a hazardous materials incident. Emphasis is placed on hazard assessment, risk management, legal and regulatory compliance, coordination of multi-agency responses, implementation of protective actions, and the demobilization/termination phase of a hazmat event.

The training is designed to align with both California requirements (CSTI / CalOES) and federal HAZWOPER/OSHA standards.

REGISTRATION COST

\$220.00
